

Ok, enough  
food for  
dinner!

Let's walk back  
before the monsters  
come out of hiding  
when the air  
gets cooler  
in the  
evening

oh, do they like  
mushrooms too?

Yes, they eat all  
they can get  
their hands on

ok, let's walk home then

Hey! Stop! You are going the wrong way!

The mountains are full of monsters!

I need to  
learn to turn  
around!

I can teach  
you the .reverse  
method!

Complete method `.reverse` inside `Direction`. This method should return a `Direction` by calling '`this.turn.turn`'

A 3D rendering of a forest scene. In the foreground, a young boy with brown hair, wearing a green tunic and red pants, stands facing away from the viewer. He is holding a small white, feathered object. A white, winged creature with long white hair is crouching on the ground in front of him, looking up at him. The background is filled with tall, thin trees and sunlight filtering through the leaves.

Thanks for helping  
me, I felt so stuck!

I have to ask,  
what is this  
*'this'*?

**'this'** is a  
kind of  
parameter

By using  
parameters we can  
generalize behavior

The 'this' parameter becomes 'North' when we use the method call 'North.reverse'

and 'South' when we call 'South.reverse'

A young boy with brown hair, wearing a green tunic, red breeches, and a brown belt, walks away from the viewer through a dense forest. He is holding the hand of a small, white, winged dragon. The dragon has a tuft of hair on its head and purple eyes. They are walking on a dirt path surrounded by tall trees and lush green grass. A speech bubble originates from the dragon, containing the text "We can practice with 'this' on the way home!"

We can  
practice with  
'this' on the  
way home!
